

Field Validation Test (RT-5)

 [RT-22] Field Validation Tests Created: 02/Aug/18 Updated: 02/Aug/18 Resolved: 02/Aug/18

Status:	Failed
Project:	Resorts Tapped
Component/s:	None
Affects Version/s:	None
Fix Version/s:	None

Type:	Test Execution	Priority:	Medium
Reporter:	Tansey Sussex	Assignee:	Unassigned
Resolution:	Done	Votes:	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original Estimate:	Not Specified		

Test Preconditions:	<ul style="list-style-type: none">• Refer to test plan  RT-1 Open• The app can be accessed here• Login using user or admin credentials• Requirements can be accessed in Specs and Production cards on Trello board
Test Script:	<ol style="list-style-type: none">1. From a resort home screen click the Add New Contact Group button, add the contact type, and cancel<ul style="list-style-type: none">○ Ensure contact didn't save2. Repeat steps above and save<ul style="list-style-type: none">○ Contact will show up on Contacts list3. Select the new contact from the list4. Click the Add New Contact link and edit the fields below using valid data<ul style="list-style-type: none">○ Check that the following fields validate as defined in requirements○ Name*○ Phone*○ SMS* (only req. if no phone number entered)○ Website<ul style="list-style-type: none">▪ Test that site opens correctly using the open button after entering

	<ul style="list-style-type: none"> o Email o Contact Active - toggle to activate Summer & Winter o Dining - toggle to on to see dining settings o Menu URL - check that it only takes valid URL structure o Reservations URL - check that it only takes valid URL structure o Map Coordinates - Check that you can set, clear, and save a pin o Description <ul style="list-style-type: none"> ▪ Verify formatting, inserting a link, inserted data types, headings, etc. o Image <ol style="list-style-type: none"> 5. Confirm that resort updates can't be saved without completing the required fields (designated by a star above) 6. Confirm that error messages display correctly for invalid data that doesn't comply with requirements
Test Postconditions:	Contact fields should validate information and display error messages for invalid data as detailed in requirements. Contacts should not save without the minimum required fields.
Test Execution Notes:	<ul style="list-style-type: none"> • Refer to test plan  RT-1 Open • Refer to test case  RT-5 Ready
Expected Result:	The contact fields should accept information as detailed in the requirements, validated information should only save when valid data is entered, all field options should be usable and understandable.
Actual Result:	Fields accepting information outside of requirements, contacts saving without valid data entered in required fields, description box hyperlink not functioning as expected, description box formatting not behaving as expected, custom sort toggle bar erasing contact data.
