	RT-22	Field Validation Tests	Test Execution	Failed	
Test Preconditions:	<ul style="list-style-type: none">Refer to test plan  RT-1 OpenThe app can be accessed hereLogin using user or admin credentialsRequirements can be accessed in Specs and Production cards on Trello board				
Test Script:	<ol style="list-style-type: none">From a resort home screen click the Add New Contact Group button, add the contact type, and cancel<ul style="list-style-type: none">Ensure contact didn't saveRepeat steps above and save<ul style="list-style-type: none">Contact will show up on Contacts listSelect the new contact from the listClick the Add New Contact link and edit the fields below using valid dataCheck that the following fields validate as defined in requirements<ul style="list-style-type: none">Name*Phone*SMS* (only req. if no phone number entered)Website				

	<ul style="list-style-type: none"> ▪ Test that site opens correctly using the open button after entering ○ Email ○ Contact Active - toggle to activate Summer & Winter ○ Dining - toggle to on to see dining settings ○ Menu URL - check that it only takes valid URL structure ○ Reservations URL - check that it only takes valid URL structure ○ Map Coordinates - Check that you can set, clear, and save a pin ○ Description <ul style="list-style-type: none"> ▪ Verify formatting, inserting a link, inserted data types, headings, etc. ○ Image <ol style="list-style-type: none"> 6. Confirm that resort updates can't be saved without completing the required fields (designated by a star above) 7. Confirm that error messages display correctly for invalid data that doesn't comply with requirements
Test Postconditions:	Contact fields should validate information and display error messages for invalid data as detailed in requirements. Contacts should not save without the minimum required fields completed.

Description

This test checks that the contact fields are correctly validated and should prompt the appropriate error alerts if invalid information is entered.
