

[Adding Resorts](#) (RT-4)

 [RT-11] [Adding Resorts Test](#) Created: 01/Aug/18 Updated: 03/Aug/18 Resolved: 01/Aug/18

Status:	Failed
Project:	<u>Resorts Tapped</u>
Component/s:	None
Affects Version/s:	None
Fix Version/s:	None

Type:	Test Execution	Priority:	Medium
Reporter:	<u>Tansey Sussex</u>	Assignee:	Unassigned
Resolution:	Done	Votes:	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original Estimate:	Not Specified		

Test Preconditions:	<ul style="list-style-type: none">• Refer to test plan  <u>RT-1</u> Open• The app can be accessed <u>here</u>• Login using admin credentials
Test Script:	<ol style="list-style-type: none">1. Click the add resort button on the admin home page2. Add new resort details<ul style="list-style-type: none">○ Name○ Resort ID should be unique○ County- should default to US and allow AU to be selected as the other option○ Map - a map file must be added to save a new resort○ JSON file (not used for all resorts)○ Emergency - Add emergency contact info field and check phone number validation (format will follow phone number format used by the selected country) by selecting the Add Group button<ul style="list-style-type: none">▪ Test toggling between seasonal and non-seasonal resort emergency field▪ Observe that if the contact info is listed as summer then the other box flips to winter to ensure two different seasons are listed.

	<ul style="list-style-type: none"> ▪ Check that emergency details can be entered for each season <ul style="list-style-type: none"> ○ Ensure save button is inactive until valid emergency info is entered 3. Cancel new resort which will return you to the admin home page <ul style="list-style-type: none"> ○ Confirm resort didn't save and isn't listed on admin home page ○ Using add new resort button open the new resort page again ○ Confirm that no details from cancelled resort are present 4. Add new resort details as above 5. Save resort <ul style="list-style-type: none"> ○ Confirm resort saved and was added to admin's resort list
Test Postconditions:	The admin should be able to add, cancel, and save a new resort. Required fields should not allow saving until valid and required data is entered.
Test Execution Notes:	<ul style="list-style-type: none"> • Refer to test plan  RT-1 Open • Refer to test case  RT-4 Ready . • Refer to bug report  RT-7 In Progress .
Expected Result:	Admin should be able to add details for a new resort, cancel the addition, re-select to add a new resort, and add a new resort using the fields as required/validated.
Actual Result:	Admin could add resort details and cancel that addition, however when the option to add a new resort was chosen a second time, the emergency data that had been cancelled the first time remained present in the emergency fields of the new resort details screen. All other fields and tests behaved as expected.
